# Developing a Knowledge and Skills Framework (KSF) for Community Link Workers in Scotland

## What

A KSF defines and describes the knowledge and skills required to be effective in your role and deliver a quality service.
It supports a fair and consistent approach to learning and professional development.

## Why

A commitment in the Population Health Framework; in support of learning and development; to support competence and confidence; to offer greater consistency to role; to enhance professional identity; to demonstrate CPL and support reflective practice, supervision and career conversations.

## How

Supported by a reference group;
informed by existing frameworks and research;
co-produced with CLWs and their employing organisations;
through the identification of current and required learning content;
socialised and tested before being finalised.

## When

Recruitment underway; focussed work for the remainder of this financial year; but with a recognition further development, implementation and testing activity will be required next year.
